Base diameter : 95cm (37.5in)

Height, floor to table top: 86.5cm (34in)

Height, base with globe: 123cm (48.5in)

# Personalisation

## Cartography Edits

20 cartography edits are included in the commission of a 50cm, 65cm or 80cm globe.

Cartography edits are text-based edits and can include anything from adding a special town or place that might not otherwise be on the map to highlighting special places in a different colour so they stand out.

All major cities and capitals are on our maps as standard.

Examples of requests include adding holiday destinations, university names, suburbs, or neighbourhoods. For example, New York City is on the map, but Brooklyn is not, unless requested. We can highlight the label and placemaker in a different colour (we suggest a claret red for good visibility, shown in photo)

# Personalisation

## Bespoke Additions

We offer bespoke illustrations which are hand-drawn and hand painted. Other popular requests include travel routes and handwritten calligraphy, which are quoted on top of the price of the globe.

The decision to add further detail to your commission can be made after you place your order. We provide digital mock-ups for approval on placement, sizing and style before your globe is made.

# Personalisation

## Information Lists

Our 50cm, 65cm, and 80cm globes include the following lists located in the oceans around the globe:

- Heads of State / World Leaders
- United Nations Security Council
- Most Practiced Religions
- Most Used Languages
- EU Member States
- Area and Population of Continents
- Top Cities by Population

You can leave these lists on, remove them, or have them replaced by text of your choosing.

# Hand Engraved Message

We offer up to 100 characters as part of your commission of a 50cm, 65cm, or 80cm diameter globe.

This message is hand-engraved on the solid brass meridian that encircles the globe, done using traditional tools.

This is the perfect place for names, special dates, or a quote. Please make sure to specify the engraving exactly as you would like it including punctuation.

# Horizon Bands

Our horizon bands contain the following, from the innermost to outermost ring:

1. The Wind Rose denotes the classical winds from the mariners compass. Used originally to denote direction in sea navigation by european sailors.
2. Cardinal directions (North, East, South, West) and intermediates
3. The Zodiac with corresponding dates
4. The British Astronomer Royal, from Flamsteed in 1675 to Rees of present. Established shortly after Galileo's death by Charles II with the instruction of applying 'himself with the most exact care and diligence to the rectifying of the tables of the motions of the heavens, and the places of the fixed stars, so as to find out the so much desired longitude of places for the perfecting of the art of navigation'
5. Months with corresponding dates
6. Sidereal compass - depiction of constellation positions in rising and setting sun. Used to gather direction by the position of stars in the night sky.
7. Gregorian Calendar
8. Equinoxes and Solstices
